NEOWAVE

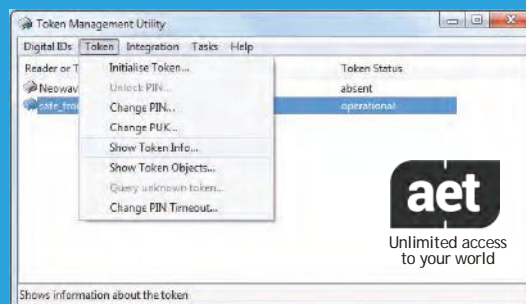

Badgeo ID 2.0 is a personal card to protect your data in mobility and to secure network access. Badgeo ID 2.0 offers double factor strong authentication features based on smart cards. Its scalability allows users to host certificates for encryption, digital signature and all services related to dematerialization.

Badgeo ID 2.0 solutions are compatible with most currently deployed business software and equipment in companies, professional organizations and authorities.

Badgeo ID 2.0 allows a centralised logical and/or physical rights access management inside your organization.

Our partners' administration tools interface with Badgeo middleware, authorizing:

- PKI certificate and MIFARE/DESFire key generation
- Enrollment (Badgeo/user matching)
- Reliable logical and/or physical access logs management
