

NEOWAVE received the security Visa at the 2022 ANSSI award ceremony

NEOWAVE's Winkeo-A FIDO2 and Winkeo-C FIDO2 authentication keys received ANSSI's security Visa award at a ceremony on September the 15th 2022, in recognition of their security excellence. The products were CSPN certified by ANSSI in April 2022. NEOWAVE is specialised in strong authentication and offers efficient solutions to help protect digital assets from cyberattacks. This award is a guarantee of trust for users.

The security Visa, an additional guarantee of quality

Winkeo FIDO2 USB security keys, designed and developed by NEOWAVE, are physical devices for strong authentication to Web and cloud services. Compatible with the FIDO U2F (for double authentication) and FIDO2 (for passwordless authentication) protocols, they rely on advanced cryptography mechanisms. They also embed a security component certified Common Criteria EAL5+ which reinforces the level of protection. 100% manufactured in France and labeled "Cybersecurity Made in Europe", they comply with European security requirements (RGS, eIDAS, GDPR, PSD2).

These guarantees of reliability, to which is now added the security Visa of the French National Cybersecurity Agency (ANSSI), particularly meet the needs of government authorities, Operators of Vital Importance (OVI) and companies wishing to efficiently protect their sensitive data.

About the ANSSI security Visa

The security Visas issued by ANSSI make it possible to easily identify the most reliable solutions that are recognised as such following an evaluation performed by evaluation centres licensed in accordance with rigorous and tried and tested methods. Depending on the context and need, this Visa takes the form of a certification or qualification.

NEOWAVE's Winkeo FIDO2 keys obtained the security Visa for their certification in April 2022, in recognition of their robustness against cyberattacks. ANSSI recommends favoring the use of physical equipment that has undergone a security assessment to guarantee a high level of protection. *"The certification is a source of great pride for our team. It confirms our constant commitment to the implementation of trusted solutions."* declares Bruno BERNARD, CEO of NEOWAVE.
